About me:

I am seeking a position of a Full Stack developer with emphasis on node.js and relevant technologies.

I am methodological and I plan ahead for the code I write.

I strive to write clean, self-explanatory code.

I constantly learn new skills and technologies and implement them where they belong.

I am a great team player.

I enjoy my work, I love technology, And I want to further develop my professional skills and to contribute all I know, with everything I've got, to my workplace and team mates.

Experience:

1/1/2022 - 38/2/2023: Full stack development course at Code Israel. A 900 hour course + Final Project.

Final Project:

A website plugin which turns every page in your website into a social network around that page's topic. It allows the page visitors to:

- a. Real-time chat
- b. File sharing
- c. Forum
- d. Friends + follow friends

All of this is per page.

See example here: <https://specialsocialnetwork.netlify.app/>

See code here: <https://github.com/izhak655/SocialNetwork>

See Specification + Design document here: <https://github.com/izhak655/characterization>

In this project I implemented the following Technologies:

- a. Node JS
- b. Express
- c. Sockets
- d. SQL (Sequelize) over mysql
- e. HTML / CSS + Vanilla JS.

Technologies:

Vanilla JS / iNodeJS / Express / Sockets / SQL / mysql / Sequelize/ PHP/ HTML/ CSS/ GitHub/ PostMan/

Languages:

Hebrew: Mother Tongue, English: Good, Russian: Good.,
